Professional summary

AI Engineer specializing in LLMs, RAG pipelines and autonomous AI agents (LangChain, LangGraph, FAISS/ChromaDB). Maintained 92%+ task accuracy across real-world LLM agent deployments; skilled in prompt engineering, LLM evaluation and cost-aware, latency-aware system design. Production experience with US enterprise pipelines (Southwest Airlines, Humana) plus AI product delivery as a founding member of THE PARADOX for clients across the US, UK, Australia and Canada. Continuously hands-on with autonomous AI agents — mapping their capabilities and deploying them to boost productivity.

Technical skills

LLMs & RAG: LangChain, LangGraph, GPT-4o, OpenAI, Anthropic (Claude), FAISS, ChromaDB, RAG pipelines, vector embeddings, prompt engineering, tool calling, conversational memory
Generative AI: LLM fine-tuning (LoRA/QLoRA), text generation, NER, summarization
ML / DL / NLP: PyTorch, TensorFlow, Keras, scikit-learn, supervised & unsupervised learning, transfer learning, CNNs, recommender systems, sentiment analysis, model evaluation
AI evaluation: hallucination detection, LLM benchmarking, prompt testing pipelines, cost-aware LLM optimization, latency-aware system design
Deployment: FastAPI, Flask, Streamlit, Twilio, n8n, Vercel, GPU pipelines (NVENC), environment-aware deployments
Cloud: AWS (Bedrock, Lambda, S3, SageMaker, EC2)
Programming & data: Python, SQL (advanced: CTEs, window functions, query optimization), Git, Pandas, NumPy, MySQL, MongoDB, Power BI

Experience

Founding Member & AI Systems Engineer — THE PARADOX (AI engineering studio) · 2025–present

- **PSYCHE OS** — 26-agent system turning 6,000+ real conversations into evidence-based psychological profiles: 9-step pipeline, per-dimension micro-agents, agent-debate for contested inferences. Built for HR teams and coaches.
- **Outreach/content automation** — WhatsApp, LinkedIn and mail processes fully automated, powered by Groq API keys.

AI Engineer — NeuralCraft Pixelgenius Pvt Ltd · Mar–May 2026

- **Southwest Airlines (AI Engineer)** — maintained the AWS cloud pipeline (Bedrock, Lambda, S3, SageMaker) behind a secure internal GPT platform; tested data upgrades to verify development-side fixes worked correctly before production release.
- **Humana (ETL Tester)** — maintained the ETL testing pipeline for a US healthcare client: SQL testing and validation of data correctness and transformation logic; verified development upgrades on the data before production.

Research Associate – AI — Keywords Studios India Pvt. Ltd., Gurgaon · Apr–Sep 2025

- Tested and evaluated autonomous AI agent outputs in real-world web environments for a confidential AGI project — tracked task success rates, maintaining 92%+ accuracy across multi-step reasoning and navigation benchmarks.
- Wrote, iterated, and optimized prompts for LLM-powered agents; tuned parameters and control rules for response quality and tool-use reliability; analyzed failure cases and fed findings

back into prompt, workflow, and model fine-tuning/alignment improvements.

Data Science Intern — AAM Infotech Pvt. Ltd., Gurgaon · Oct 2024–Mar 2025

- Built supervised ML models including a collaborative-filtering recommender; handled the end-to-end pipeline from data ingestion to model evaluation.
- Cleaned and preprocessed datasets; built dashboards communicating metrics and insights to non-technical stakeholders.

Selected projects

- **The Nexus Cloud** — autonomous content pipeline: discovery, engagement ranking, GPU rendering and scheduled posting across 69 channels on major social media platforms with full DB provenance; maintaining the pipeline while scaling to more than 400 channels on major social media platforms.
- **AURA** — multimodal emotion AI (PyTorch + HuggingFace Transformers): text, voice and facial emotion engines fused in a 28-emotion VAD taxonomy, with sarcasm and emotional-drift detection steering a companion LLM's tone in real time.
- **YouTube Transcript RAG Chatbot** — LangChain + GPT-4o-mini, FAISS/ChromaDB, Streamlit: transcript extraction, semantic chunking, sub-second context-aware Q&A.
- **Depression prediction** — scikit-learn decision-tree on a 413,769-row dataset; end-to-end pipeline to a deployable model.

Education & training

Data Science Professional Training · Ducat — The IT Training School · Apr 2024–Mar 2025
BSc (Non-Medical) — Physics, Chemistry, Mathematics · Indira Gandhi University (KLP College, Rewari) · 2020–2023
Secondary (X) — 90% · **Senior Secondary (XII)** — 91%
English: EF SET 76/100 — C2 Proficient (certified)

Interests

Mathematics, AI, and psychology — formal systems, machine intelligence, and cognitive science; understanding how complex systems work from first principles.
